Issue ID	Severity	Description	Steps to Reproduce	Expected Behavior	Actual Behavior	Device/Browser	Screen-Recording				
1	Minor	When adding or removing audio stories from a playlist, the header within the playlist updates immediately to reflect the correct number of stories. However, in the Library overview, which displays the total number of stories in each playlist, the count does not update until the page is reloaded.	Log in to the Quinn app with valid credentials. Navigate to the Library and select an existing playlist. Add or remove an audio story within the playlist. Observe the header within the playlist, which reflects the correct count of stories immediately. Navigate back to the Library overview. Observe the displayed count of stories for the playlist in the Library overview. Reload the page and observe the count again	The number of stories in the playlist displayed in the Library overview updates immediately after adding or removing an audio story.	The number of stories in the playlist displayed in the Library overview does not update until the page is reloaded.	Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/9fc4e87d419645a492e1f998feaeb2d6				
2	Minor	When favoriting a playlist made by another user, the playlist is added into my library. The value of playlists in the overview of library is also increased accordingly. However when I click on the top right profile button and access my account from the dropdown, It is listed that I have one less playlist.	- Log into Quinn using valid credentials. - Find a story and open it - Scroll down to user comments - Click on a user profile that contains playlists - Favorite the playlist - Click on the library tab - Observe amount of playlists - Click on the account tab via top right corner dropdown - Observe and compare the amount of playlists listed vs the amount listed in the library tab	Favoriting a playlist adds it to the Library and updates the playlist count in both the Library overview and the My Account section to reflect the correct total.	Favoriting a playlist adds it to the Library, and the Library overview count increases correctly. However, the My Account section displays a playlist count that is one less than the actual total.	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/294e3b7049b74c52ac9322f2e710b334				
3	Minor	When favoriting individual stories, they are correctly added to the "Favorites" playlist automatically. However, the total likes count in the Account Overview tab incorrectly displays as zero. Additionally, when favoriting an entire playlist created by another user, the likes count in the Account Overview tab still remains at zero, despite previous tests showing that this action should increase the likes count.	- Log in to the Quinn app with valid credentials. - Navigate to an individual story and favorite it. - Verify that the story is added to the "Favorites" playlist automatically. - Navigate to the Account Overview tab via the profile dropdown and check the total likes count. - Next, navigate to a playlist created by another user and favorite the entire playlist. - Return to the Account Overview tab and verify the total likes count again.	-Favoriting individual stories increases the total likes count in the Account Overview tab. -Favoriting an entire playlist made by another user also increases the total likes count in the Account Overview tab, reflecting the action accurately.	- Favoriting individual stories correctly adds them to the "Favorites" playlist, but the total likes count in the Account Overview tab remains at zero. - Favoriting an entire playlist made by another user does not increase the total likes count in the Account Overview tab, even though previous tests indicate this action should update the count.	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/3cb2e407f1c64af4a857e4946834a093				

Issue ID	Severity	Description	Steps to Reproduce	Expected Behavior	Actual Behavior	Device/Browser	Screen-Recording				
4	Major	When editing/adding a description to a playlist, the description is not displayed anywhere for the account holder, nor in a shared linked viewed by a non-user	- Log in to the Quinn app with valid credentials. - Navigate to a pre-existing playlist - Edit the description of the playlist and click save - Observe the playlist screen - Open edit details again and confirm the added description is still inputed - Share the link with a non-user (open in seperate browser) and attempt to locate the display of the added description	When editing or adding a description to a playlist: - The description is saved and displayed correctly on the playlist screen for the account holder. - The description is visible to non-users when the playlist is shared via a link (if the playlist is public).	When editing or adding a description to a playlist: - The description is not displayed on the playlist screen for the account holder. - The description is also not visible to non-users when the playlist is shared via a link. PLEASE NOTE... This issue is only involving the webpage verison, when the playlist is opened on the iOS app, the description is viewable	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/6ec435aa3150412d88e66b4f9e4435c0				
5	Major	The title input field for playlists accepts spaces as valid input. Saving a playlist with a title consisting only of spaces results in the playlist appearing nameless. This affects usability, as playlists become difficult to identify or search for, especially for other users or when using search functionality.	Log in to the Quinn app with valid credentials. Edit the title of a playlist. Enter only spaces in the title input field. Save the playlist. Navigate to the Library view and observe the playlist title.	The title input field should validate and reject input consisting only of spaces. An error message should prompt the user to enter a valid title.	The playlist title field accepts spaces as valid input. The playlist is saved but appears nameless in the Library view Also this playlist is now unsearchable	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/f0f9ea727585405ab03d7897b7cc7469				
6	Enhancement	Currently, users can only add stories to playlist by navigating to the playlist itself and searching for stories in the search field. This workflow is functional but lacks flexibility. Allowing users to add stories to specific playlist directly from other aspects of the application (while browsing creator profiles, categories, etc) would greatly improve the UX	Please see screen recording	Please see screen recording	Please see screen recording	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom.com/share/90a45f24de6b4880806e27bf7fafca37				
7	Minor	The total duration of a playlist listed is one second more than the actual sum of all the stories in a playlist . This discrepancy persists even when the playlist contains only a single story	Log in to the Quinn app with valid credentials. Open a playlist and add one or two stories to the playlist Compared the durations listed for each story compared to the total duration listed in the header of the playlist Ensure they are equal	The total duration in the playlist header should accurately match the sum of the durations of all stories in the playlist.	The total duration displayed in the playlist header is always one second longer than the sum of the durations of all stories in the playlist, even when the playlist contains only a single audio file.	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64) " Safari Version 15.6.1 (16613.3.9.1.16, 16613)	one second difference.png				

Issue ID	Severity	Description	Steps to Reproduce	Expected Behavior	Actual Behavior	Device/Browser	Screen-Recording				
8	Enhancement	Adding stories offline showed changes in the UI but failed to synchronize with the server after reconnecting, causing changes to be lost.	Log in to the Quinn app with valid credentials. Open a playlist and perform a keyword search Wait for search results to populate Simulate a network interruption using chrome devtools network tab by switching to offline mode or simply turn off wifi directly from the computer While "offline" press the add button next to a story After adding the story to the playlist, observe the change made in the playlist Turn the network connection back on and reload the page Inspect that the change was updated now that the browser reconnected to the network	When adding a story to a playlist while offline, the UI should reflect the addition immediately or the UI should notify the user that there has been a interruption in the network connection Upon reconnecting to the network and refreshing the page, the offline addition should synchronize with the server, and the playlist should retain the added story.	dding a story offline updates the UI to show the addition, the UI has no indication that there has been a network interruption After reconnecting to the network and refreshing the page, the addition made offline does not synchronize with the server, resulting in the story not being added to the playlist	"Mac 11.7.10 Chrome Version 132.0.6834.84 (Official Build) (x86_64)" Safari Version 15.6.1 (16613.3.9.1.16, 16613)	https://www.loom. com/share/030c06a9de94 4598a370d763e39eeeed				
9	Minor	After adding a story to a pre-existing playlist, the overview of playlists within the Library, specifically under the Recent Activity list, incorrectly displays that the playlist contains only one story. However, when opening the playlist, it correctly shows that there are actually two stories.	Log in to the Quinn app with valid credentials. Open a playlist that currently contains one story. Add one more story to the playlist. Navigate back to the Library tab to view the overview of playlists and the Recent Activity list. Validate the following: The audio count in the playlist overview details within the playlist folder reflects the updated total (2 stories). The audio count in the Recent Activity list reflects the updated total (2 stories).	After adding a story to the playlist: The playlist overview in the Library tab should immediately display the updated story count (2 stories) within the playlist folder. The Recent Activity list should also reflect the correct updated count of 2 stories.	After adding a story to the playlist: The playlist overview in the Library tab within the playlist folder correctly displays the updated story count (2 stories). However, the Recent Activity list still displays the old count (1 story) instead of the updated count. The correct count is only displayed after the app is closed and reopened.	iOS Quinn App 2.4.1 iOS Version 18.2.1 15 Pro Max	https://drive.google. com/file/d/1Jov4ZjGRTKG 3h2fUmvqrb_utsMrOKGhs/ view?usp=sharing				
10	Enhancement	When removing a story from a playlist, the current process requires opening the playlist, clicking the three-dot icon in the top right corner, selecting "Edit Playlist" from the dropdown menu, and then removing the story from there. To improve usability, it would be more convenient if the option to remove a story were included in the menu accessed by clicking the three-dot icon directly next to the story itself.	Log in to the Quinn app with valid credentials. Open a playlist that contains one or more stories. Click the three-dot icon in the top-right corner of the playlist screen. Select Edit Playlist from the dropdown menu. Locate the story you want to remove and remove it from the playlist. Observe that there is no option to remove a story directly from the three-dot icon next to the story itself.	Users should be able to remove a story directly by clicking the three-dot icon next to the story itself, providing a quicker and more intuitive flow for removing individual stories from a playlist.	The option to remove a story is not available in the three-dot icon menu next to the story. Instead, users must click the three-dot icon in the top-right corner, select Edit Playlist, and remove the story from there, which adds unnecessary steps to the process.	iOS Quinn App 2.4.1 iOS Version 18.2.1 15 Pro Max	iOS enhancement.MP4
